

EXPERIENCE

• Target Media Singapore

Singapore

Product Engineer (Intern + Full Time)

Sept 2024 – Present

- Partnered with leadership to translate business needs and pain points into product features across CRM, Sales Reporting, Inventory, and Ops Deployment systems, iterating rapidly through weekly feedback cycles to deliver improvements almost every week.
- Enhanced the **Sales Booking System** (TypeScript, React, Fastify, MySQL, FastAPI), automating campaign workflows and reporting to reduce reliance on manual backend operations, allowing the department to operate with **3** staff instead of **7** without loss of throughput or accuracy.
- Delivered a reliable **Sales Reporting System** consolidating sales, client, and revenue data into dynamic dashboards for management and finance, improving transparency and supporting faster, evidence-based decisions
- Architected and integrated an **AI-powered Lead Research Agent** (OpenAI AgentSDK) within the company's CRM ecosystem to automate lead enrichment, eliminating repetitive lookup tasks and increasing sales outreach productivity by **50%**.
- Engineered a robust automation pipeline for artwork processing using **AI content vetting** (LangGraph) and CMS integration, replacing a complex multi-step workflow and saving **40** staff hours weekly.
- Introduced AI-assisted workflows across Cursor and Notion, teaching context engineering principles and establishing prompting best practices and AI usage SOPs that increased the team's iteration speed by **4x**.
- Led the end-to-end development of **Heartlanders** — a public-facing platform built from design to full-stack implementation — collaborating with Marketing and Ops to deploy NFC-enabled panels and engagement features
- Mentored a team of **4 AI interns** over **8 months** on the **AI Content Vetting and Search Tool**, a complex system replicating the content team's multi-day manual review process through LLM-based artwork analysis, logo detection, and compliance checks — guiding them in architecture, data design, and production deployment.
- Created an **IT Command Center** in Notion to centralize project and task management, supporting over **400** tasks spanning bug fixes, admin requests, and feature development.
- Implemented an **automated email-to-Notion task classifier** that categorized incoming emails into structured tasks, improving visibility and reducing turnaround time by **40%**.

• PropNex Realty Pte Ltd

Singapore

AI Development Intern

Jan 2024 - May 2024

- Engineered NLP pipelines using langchain and OpenAI GPT models, cutting manual data labelling time by **80%**
- Architected specialized evaluation pipelines to measure LLM content quality, accelerating review cycles
- Finetuned OpenAI models for specific project needs, improving pass rates for custom evaluation criteria (e.g., character limits, meeting user-selected options) from **50% to 90%**

PROJECTS

• Project Orion

Jan 2025 - Sept 2025

- Developed a Telegram bot providing access to organizational AI assistants, who has access to internal knowledge (PDF, PPTs etc) and external knowledge (APIs) to answer questions
- Implemented dynamic function calling and plugin integration using OpenAI library, with granular access rights
- Built a Knowledge Base Management System for management of AI assistants, knowledge and access control with Next.js and FastAPI, processing documents using unstructured library into Milvus vector database on GCP

EDUCATION

• Singapore Institute of Technology (SIT)

Bachelor's of Science in Applied Artificial Intelligence

2022 – 2025

SKILLS AND TECHNOLOGIES

- **Languages and Libraries::** Python (+ Pytorch, Flask, FastAPI, Pyspark, Selenium, Pandas, NumPy), JavaScript (+ React, React Native, Next.js, Express.JS), Typescript, PHP, Java, C, SQL, NoSQL, Postgres
- **Technologies::** Firebase, Supabase, Docker, Redis, AWS (S3, EC2, RDS), Posthog, GCP
- **AI Technologies::** Cursor, Claude Code, OpenAI AgentKit, OpenAI AgentSDK, LangChain, Milvus, Pinecone, HuggingFace
