

EXPERIENCE

• Target Media Singapore

Singapore

Software Engineer (Intern + Full Time)

Sept 2024 – Present

- o Partnered with leadership to translate business needs and pain points into product features across CRM, Sales Reporting, Inventory, and Ops Deployment systems, iterating rapidly through weekly feedback cycles to deliver improvements almost every week.
- o Enhanced the **Sales Booking System** (TypeScript, React, Fastify, MySQL, FastAPI), automating campaign workflows and reporting to reduce reliance on manual backend operations, allowing the department to operate with **3** staff instead of **7** without loss of throughput or accuracy.
- o Delivered a reliable **Sales Reporting System** consolidating sales, client, and revenue data into dynamic dashboards for management and finance, improving transparency and supporting faster, evidence-based decisions
- o Architected and integrated an **AI-powered Lead Research Agent** (OpenAI AgentSDK) within the company's CRM ecosystem to automate lead enrichment, eliminating repetitive lookup tasks and increasing sales outreach productivity by **50%**.
- o Engineered a robust automation pipeline for artwork processing using **AI content vetting** (LangGraph) and CMS integration, replacing a complex multi-step workflow and saving **40** staff hours weekly.
- o Introduced AI-assisted workflows across Cursor and Notion, teaching context engineering principles and establishing prompting best practices and AI usage SOPs that increased the team's iteration speed by **4x**.
- o Led the end-to-end development of **Heartlanders** — a public-facing platform built from design to full-stack implementation — collaborating with Marketing and Ops to deploy NFC-enabled panels and engagement features
- o Mentored a team of **4 AI interns** over **8 months** on the **AI Content Vetting and Search Tool**, a complex system replicating the content team's multi-day manual review process through LLM-based artwork analysis, logo detection, and compliance checks — guiding them in architecture, data design, and production deployment.
- o Created an **IT Command Center** in Notion to centralize project and task management, supporting over **400** tasks spanning bug fixes, admin requests, and feature development.
- o Implemented an **automated email-to-Notion task classifier** that categorized incoming emails into structured tasks, improving visibility and reducing turnaround time by **40%**.

• Singapore Institute of Technology

Singapore

AI Engineer (Intern)

May 2024 - August 2024

- o Contributed to Project LEARN, an initiative to improve student's proficiency in mother tongue through AI
- o Finetuned LLAMA3 using ORPO for marking task, boosting marking accuracy from **60% to 95%** on unseen data
- o Developed synthetic data pipelines, reducing manual data labeling time by **80%** and improving data diversity
- o Engineered LLM prompts to generate context-aware follow-up questions when students answers incorrectly

• SMRT

Singapore

Data Scientist (Intern)

May 2024 - Aug 2024

- o Constructed a comprehensive feature table for commuter profiling, enabling SMRT to gain deeper insights into travel patterns and facilitating advanced analytics and data science techniques.
- o Optimized ML model, achieving **97.86%** accuracy in identifying 2.35 million tourists among 6.9 million commuters
- o Improved code and memory usage, cutting processing time by **5x** for 200M-record datasets.

• PropNex Realty Pte Ltd

Singapore

AI Software Engineer (Intern)

Jan 2024 - May 2024

- o Engineered NLP pipelines using langchain and OpenAI GPT models, cutting manual data labelling time by **80%**
- o Architected specialized evaluation pipelines to measure LLM content quality, accelerating review cycles
- o Finetuned OpenAI models for specific project needs, improving pass rates for custom evaluation criteria (e.g., character limits, meeting user-selected options) from **50% to 90%**

• Singapore Institute of Technology

Singapore

Software Engineer (Part Time)

Apr 2023 - Dec 2023

- o Built a web app with ReactJS and Firebase, enabling efficient audio data collection from **1,000+ students**.
- o Led the development of multi-lingual audio-to-text API with OpenAI WhisperAI and FastAPI
- o Optimized ASR model hyperparameters, reducing CER by **10%** and improving **timestamp accuracy by 20%**.

EDUCATION

- **Singapore Institute of Technology (SIT)**

Bachelor's of Science in Applied Artificial Intelligence

2022 – 2025

PROJECTS

- **Project Orion**

Jan 2025 - Apr 2025

- Developed a Telegram bot providing access to organizational AI assistants, who has access to internal knowledge (PDF, PPTs etc) and external knowledge (APIs) to answer questions
- Implemented dynamic function calling and plugin integration using OpenAI library, with granular access rights
- Built a Knowledge Base Management System for management of AI assistants, knowledge and access control with Next.js and FastAPI, processing documents using unstructured library into Milvus vector database on GCP

- **SpeakerMetrics Pro**

Mar 2024 - Apr 2024

- Created an edge-computing AI-based feedback device for speaker feedback and analysis and presented it at the **1st International Conference on AI Sensors and the 10th International Symposium on Sensor Science**
- Built a web UI using Next.js for controlling edge devices and displaying post-presentation data.
- Implemented pose estimation and attention classification models, providing feedback on audience engagement.

- **Hoobi: Digital Loyalty Program**

Jan 2023

- Utilized ReactJS and Firebase to develop a production-ready application serving merchants and customers.
- Empowered customers with seamless stamp and reward redemption features.
- Achieved a remarkable 100% satisfaction rate based on customer feedback for the Hoobi app.

SKILLS AND TECHNOLOGIES

- **Languages and Libraries::** Python (+ Pytorch, Flask, FastAPI, Pyspark, Selenium, Pandas, NumPy), JavaScript (+ React, React Native, Next.js, Express.JS), Typescript, PHP, Java, C, SQL, NoSQL, Postgres
- **Technologies::** Firebase, Supabase, Docker, Redis, AWS (S3, EC2, RDS), Posthog, GCP
- **AI Technologies::** Cursor, Claude Code, OpenAI AgentKit, OpenAI AgentSDK, LangChain, Milvus, Pinecone, HuggingFace
